Communication skills

My communication skill goes for the motivation of understanding of purposes in the project and cares about people who I work with.

Organisational / managerial skills

One of the biggest soft skills that I can point is the curiosity and motivation for the new and beauty software.
I care a lot about the code that I read and write in projects I worked.

Job-related skills

Have taught some colleagues on previous jobs, or yet, appointed new technologies that will be a fit in the current status of the project as well.

Digital skills

Digital skills - Self-assessment grid

Always in contact with a computer, I develop and learn how to use software and tools that I needed on the way.

Also as a search for content and documentation in many cases that I was lost on the understanding of a specific tool or system.
